Train Communications

for Passenger Entertainment,

Operational Applications & Enhanced Security

Where are we today and where next?

5-10-08

Nomad Digital

Introducing Nomad

- ❑ Established in 2002
- ❑ A pioneer of real-time
wireless
broadband
data connectivity
platform and solution
to fast-moving vehicles
- ❑ More reference broadband communications projects and trials than any other train communications solution provider globally

Nomad Digital

Nomad Rail Projects (Announced)

Heathrow Express

NSB

Virgin Trains

Caltrain & CCJP

Brighton Express

Dubai Metro

c2c

Frontrunner

Nederland Spoor

Wuhan

Rotem Maglev

Nomad Digital

Southern (London to Brighton)

- ❑ Launched April 2005
- ❑ World's first genuine broadband passenger internet service
- ❑ Branded service from T-Mobile HotSpot
- ❑ 14 trains
- ❑ 70km of WiMax

Nomad Digital

Heathrow Express (London to Heathrow Airport)

- ❑ Launched April 2007
- ❑ For-Pay Passenger Internet service
- ❑ T-Mobile HotSpot
- ❑ WiMax in all tunnels under Heathrow - *World First*
- ❑ 14 trains
- ❑ Usage well above expectations

www.nomadrail.com

Nomad Digital

Virgin Trains (West Coast Mainline)

- 74 trains
- Being deployed
 - 1 train per week
- Passenger Internet ...&
- T-Mobile HotSpot
- >600 km of routes
- WiMax + 3G

Nomad Digital

Virgin Trains (West Coast Mainline)

MARKET DEVELOPMENTS

Market developments - Introduction

- ❑ Step change in interest in train communications solutions
 - Not “if” but “when”

- ❑ Global phenomenon
 - Needs and approach quite different in each regional market

- ❑ Market is now starting to be convinced that it can be done
 - many trials now coming to an end
 - now looking at the “how can we do it?”

Nomad Digital

Market developments - Introduction

- Passenger WiFi was the catalyst
 - customer loyalty/appeal
 - increased ridership
 - enhanced on-board passenger experience

- Challenges
 - business case
 - funding
 - internal priorities and constraints

Nomad Digital

REGIONAL VIEW - NORTH AMERICA

North America - General

- ❑ Rail ridership is growing in US
 - \$4.00/gallon (Euro 0.75/litre!) this summer
 - Ridership on the ascendency
 - New rail lines being opened up!
 - More systems than most Europeans realise

THE WALL STREET JOURNAL.

PAST FEATURED ARTICLE

REVIEW & OUTLOOK

Denny Pelosi
Gas prices rise, and Republicans panic.

Nomad Digital

North America - General

- ❑ Many trials have been conducted
- ❑ Focus on Passenger Internet access (WiFi)
 - Mostly free to use
- ❑ Variety of technical solutions
 - Cellular only
 - WiFi mesh
 - WiMax/cellular

Nomad Digital

North America - General

WiFi everywhere

- demand now for WiFi public transport

Because...

- Passengers are asking for it
- Rail operators see it can attract new riders
- Hard to influence ridership from efficient core operations
- Funding can be found
- Experimental business cases are being considered

Nomad Digital

North America - General

- ❑ Growing number of committed projects
 - San Francisco – BART – Extended Metro
 - Utah – FrontRunner – Commuter Rail
 - Boston – MBTA - Metro
 - Dallas-Fort Worth – TRE – Commuter Rail
 - Albuquerque – Railrunner – Commuter Rail
 - Amtrak – Acela – Business Rail
 - ...

North America – UTA - Frontrunner

- ❑ Launch April 08
- ❑ 1st US fully free commercial passenger internet service on trains
 - Free service for service life
- ❑ One of, if not, the fastest passenger internet service to date

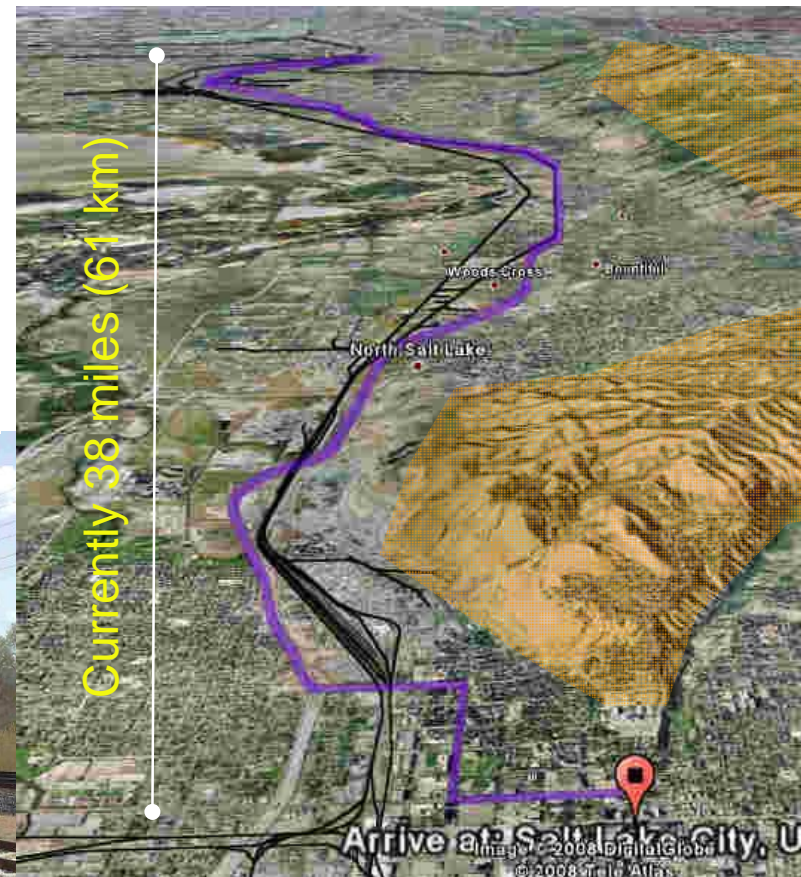

Nomad Digital

North America – UTA - Frontrunner

- ❑ 61km corridor
- ❑ >95% WiMax (EVDO fallback)
- ❑ Train-shore connection runs at 9 Mbps bi-directionally

www.nomadrail.com

Speed test

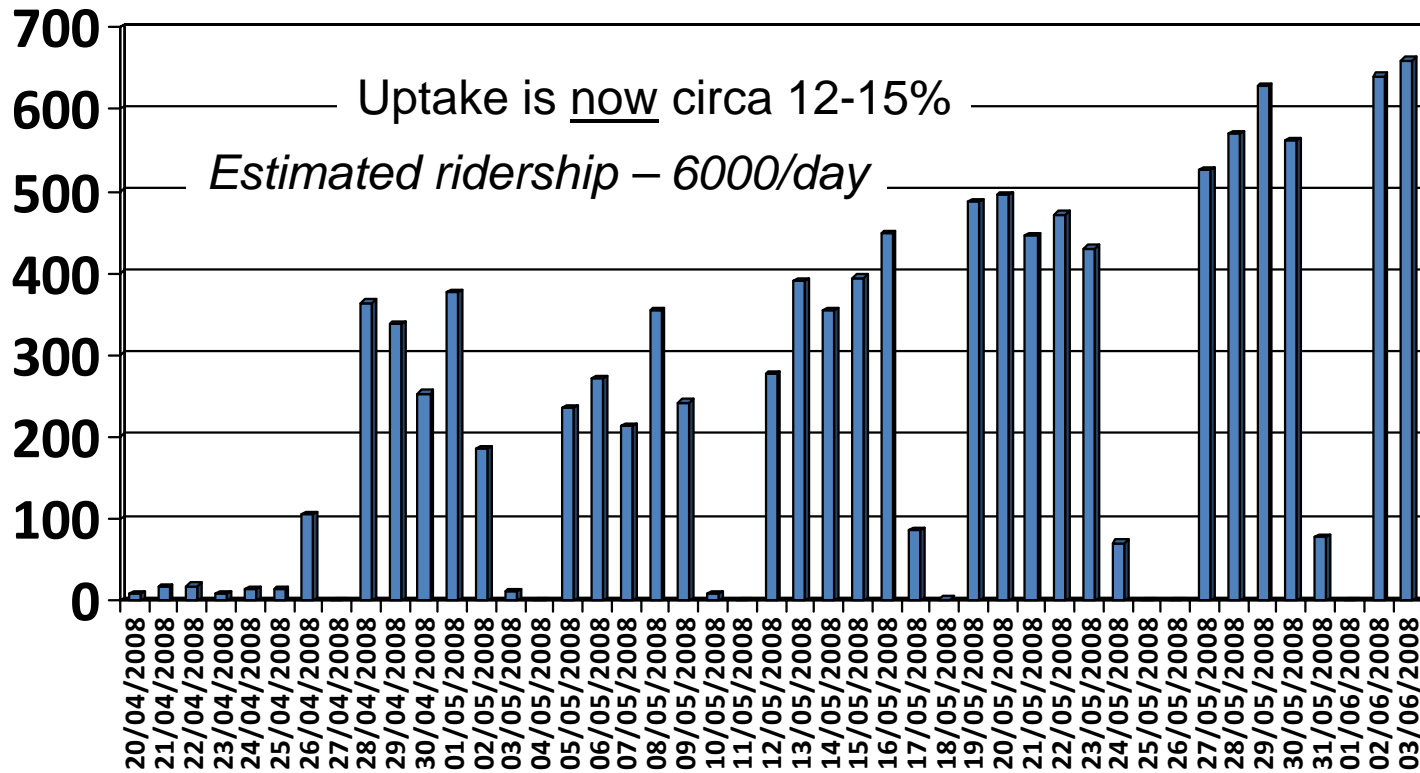

Nomad Digital

Market developments – North America - UTA

Free service

UTA User Sessions

North America - UTA

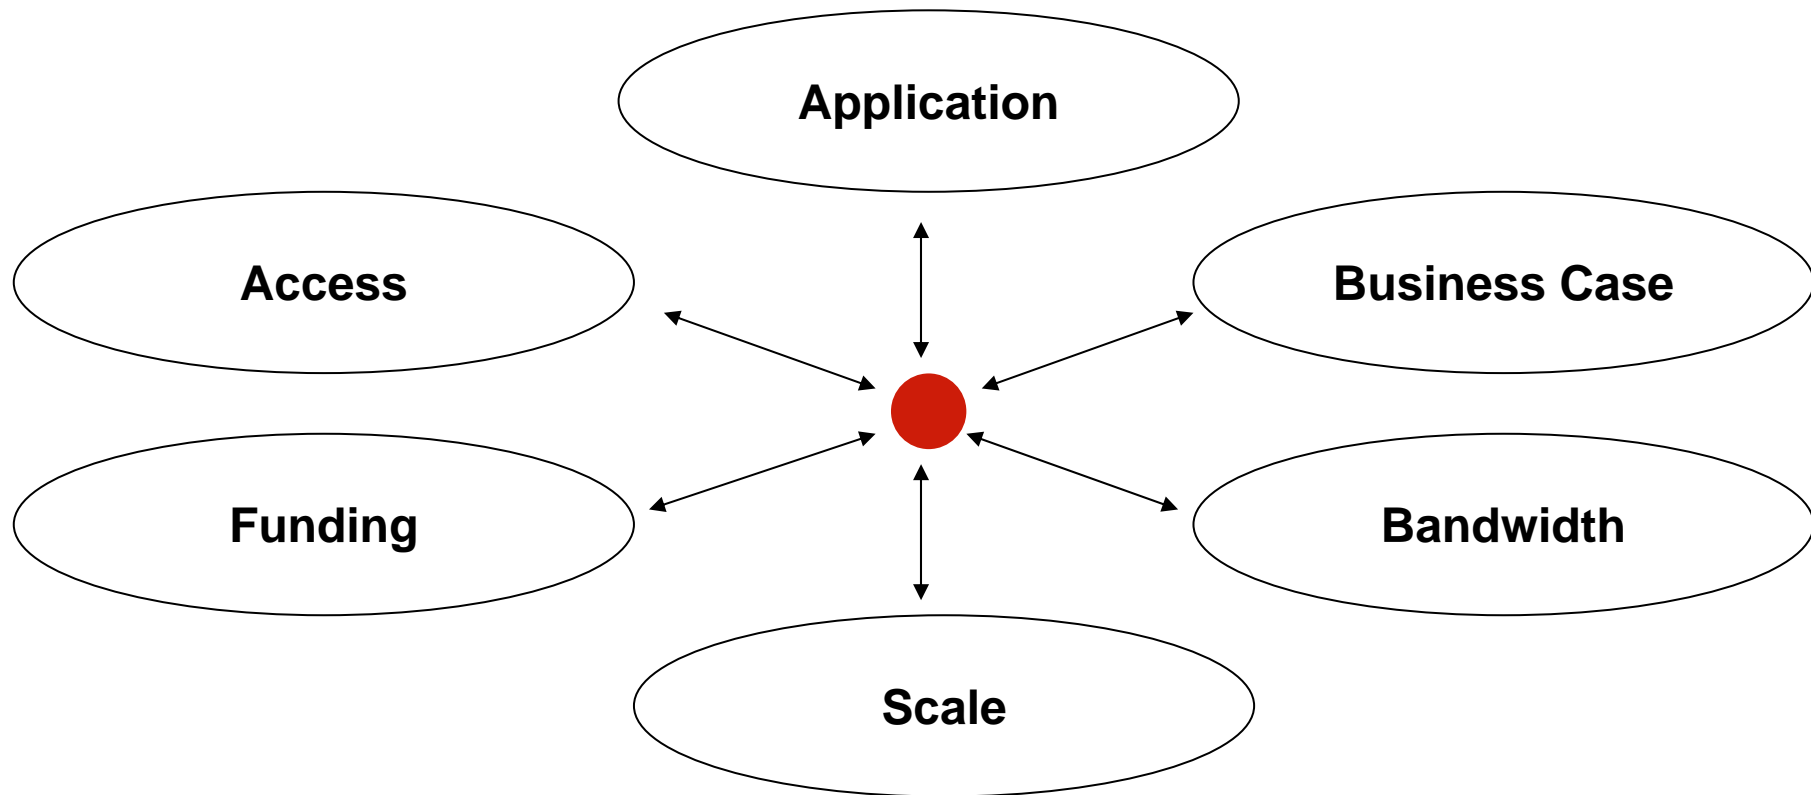

- ❑ Motivation
 - attracting riders
 - operational applications...

- ❑ Showcase for Utah
 - Heavily visited by other rail authorities

- ❑ Catalyst for other “me-too” programmes

North America - Challenges

Nomad Digital

North America – Challenges - MBTA

Framingham/Worcester Commuter Rail customers: Try our free Wi-Fi Commuter Rail Connect Test Program!

As one of the first services of its kind on commuter rail trains in the U.S., our free T Wi-Fi Commuter Rail Connect test program strives to provide free Internet access for your laptop, cell phone, PDA or Wi-Fi enabled device. In fact, any commuter rail customer riding in a coach participating in the free T Wi-Fi Commuter Rail Connect Test Program may be able to access the Internet via their enabled laptop or wireless device.

www.nomadrail.com

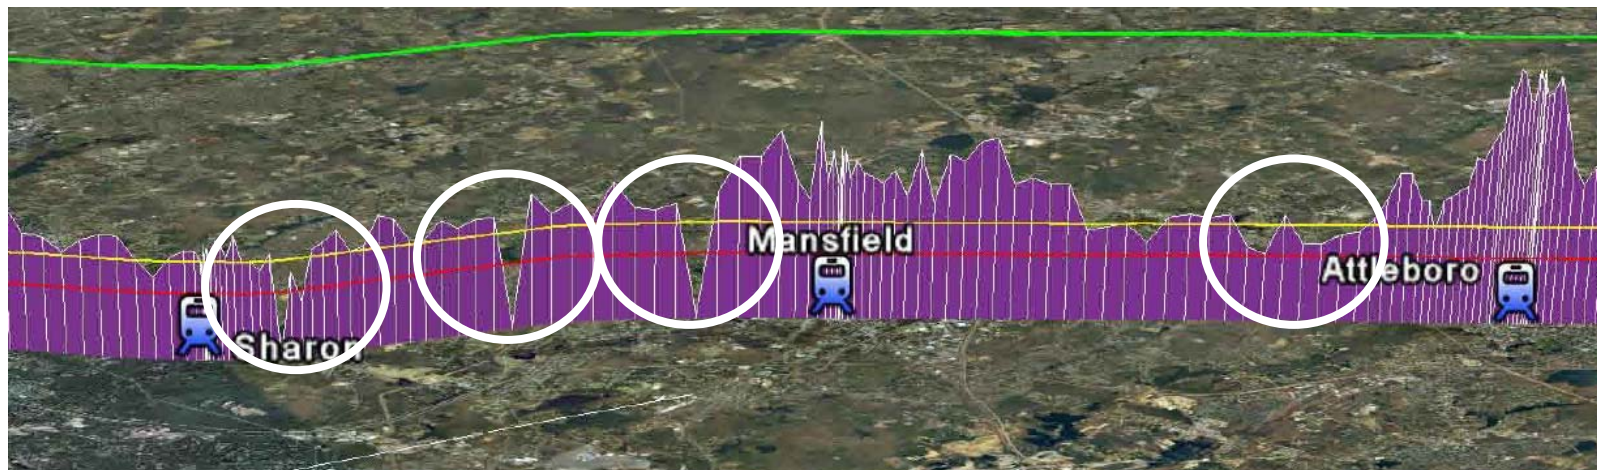

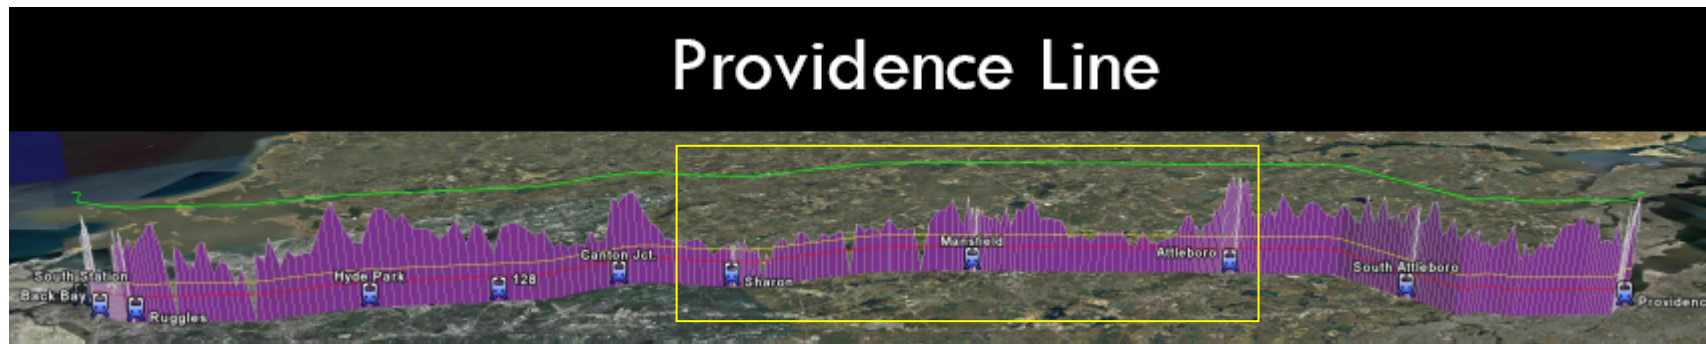

North America – Challenges - MBTA

Wi-Fi Commuter Rail Connect Test Program: Signal Strength Maps

Please note: due to the characteristics of the cellular network, there may be locations where service is intermittent or unavailable. Wi-Fi is solely dependent on the strength of the cellular signal in that area. This is the same effect as when a person experiences a “dropped” call on a cell phone when hitting a “dead zone”. Also, during our test program, Wi-Fi enabled coaches may be serving lines other than the Framingham/Worcester line. We invite commuter rail customers to try our free T Wi-Fi Commuter Rail Connect service if they’re in a participating coach. The various lines have different signal strength capabilities.

North America – Challenges - MBTA

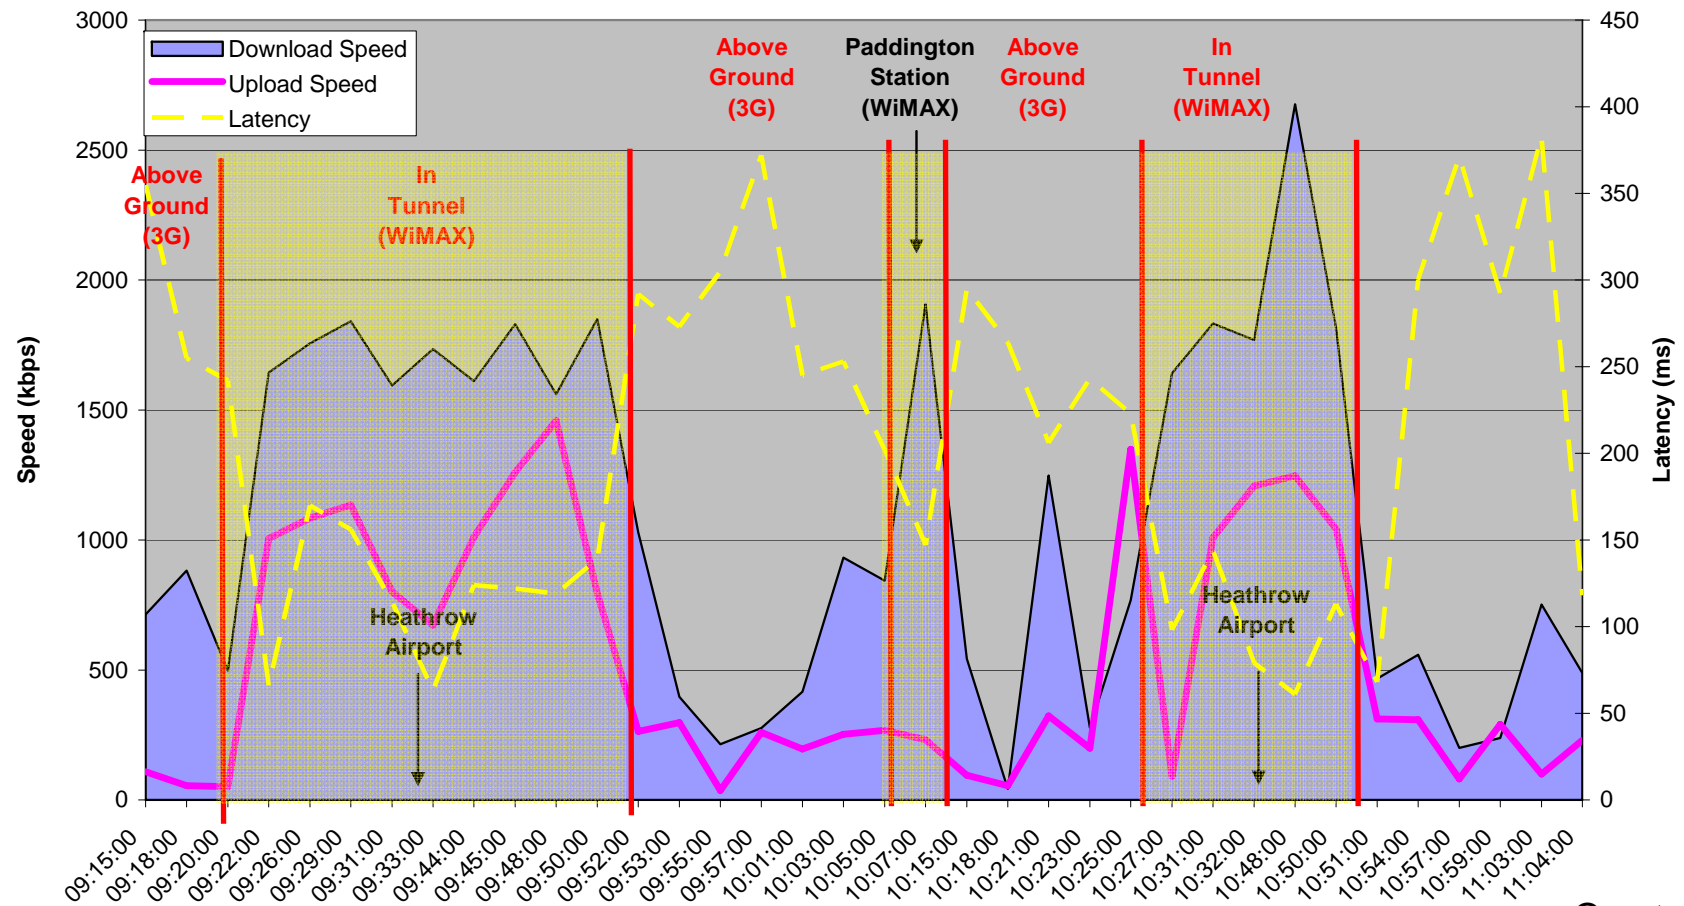

Nomad Digital

North America – Challenges

HEX Speed Test (1-10-07)

One test run

North America – Challenges

□ Uptake when free

- No of sessions rises 5-6 times
- Bandwidth consumption can rise 10 times
 - Use and abuse
 - Need lots of uncontended bandwidth
 - Cellular alone will struggle to support a free service and give a good QoS
- Some users assign little real value
 - and yet take away bandwidth from those that do
- Those that value it say they are willing to pay to get better QoS

North America – Challenges – Operator A

A typical situation

North America – Challenges – Operator A

North America – Challenges – Operator A

□ Application

- Free passenger internet
Why?
- Remote real-time ticketing
Why?
- Safety & security
Why?
- NOT train engine monitoring
Why?

North America – Challenges - Operator A

BUT

- Access issues – 5.8GHz not possible
- Cellular won't provide sufficient bandwidth
- 4.9GHz has application limitations
- Capital funding is available, but opex is a killer
- Wary of advertising driven models
- Wants control and a multi-platform system

REGIONAL VIEW – ASIA PACIFIC

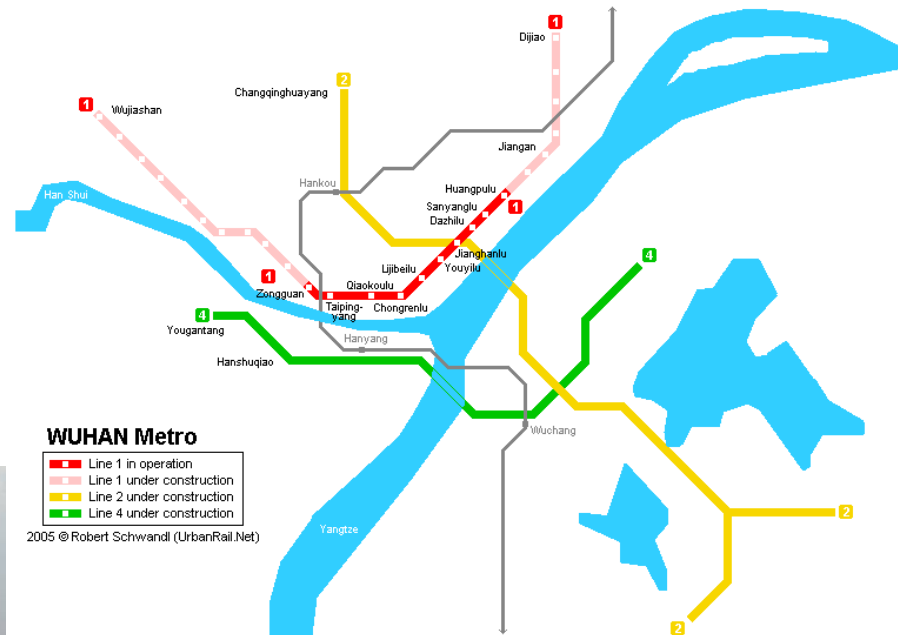

Nomad Digital

Market developments – Asia Pac

- ❑ Market exploded in last 12 months
 - China, Korea, Taiwan, Hong Kong, Japan, Australia, Singapore...
- ❑ RFPs everywhere
- ❑ Mostly metros
- ❑ CCTV driving it
 - Stringent system requirements
- ❑ Advertising is growing

Market developments – Asia Pac

REGIONAL VIEW – MIDDLE EAST

Nomad Digital

Market developments – Middle East

- New train lines planned
- Passenger WiFi
- "The Best"
 - Trains
 - Facilities
 - Systems

Nomad Digital

Market developments – Dubai

Phase1 = 69 trains

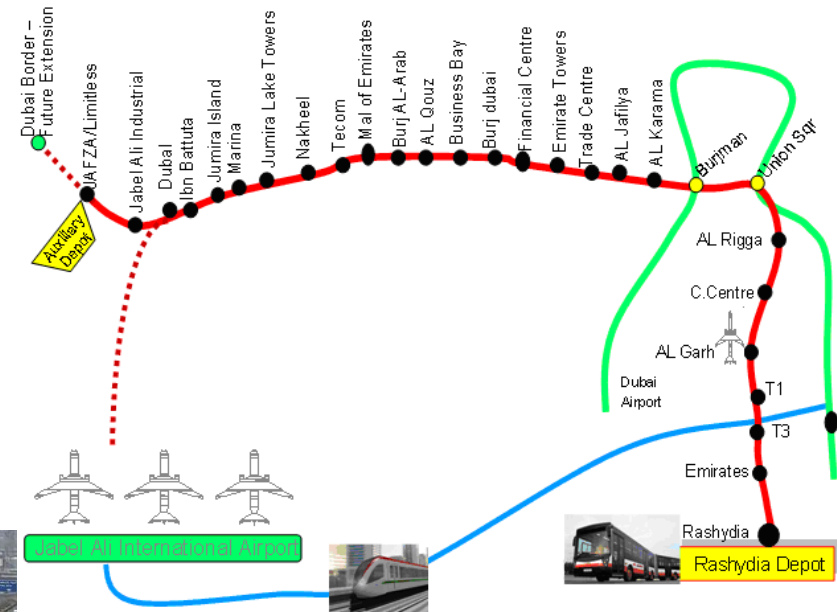

www.nomadrail.com

Market developments – Dubai

Outline of Dubai Metro Project works

Phase1 = 75km of track

Nomad Digital

Market developments – Saudi Arabia

FROM EAST GOING TO WEST:

SAUDI LANDBRIDGE PROJECT

Saudi Railway is expanding to serve you better! Soon you can travel across the kingdom with the near completion of our expansion project

- » Project Details
- » Register Interest
- » FAQ's

LINKING HOLY CITIES TOGETHER:

MAKKAH - MADINAH RAIL LINK

The Proposed passenger rail network linking Makkah and Madinah to Western port city of Jeddah

- » Project Details
- » Register Interest
- » FAQ's

SAUDI LANDBRIDGE PROJECT

- Connects Jeddah (Red Sea) to Dammam (Gulf)
- Over 1000 km of new railway
- Freight and high speed passenger service
- Land, Regulatory and other matters

MAKKAH-MADINAH RAIL LINK

- Passenger service to accommodate annual pilgrimage
- Concessionaire responsible for design, financing, construction and operation

REGIONAL VIEW - EUROPE

Market developments - Europe

- ❑ Every major market showing activity
 - Most still at trial stage
 - SNCF trials - €19m budget! – holistic approach
 - Very few have committed commercial rollouts – SJ, Thalys, DB
- ❑ New airport links being built – specifying WiFi
- ❑ RFPs due
- ❑ Many opting for trials of satellite solutions, but not all
 - Suits several operators due to geography
 - Some have rejected due to cost, intrusion or poor performance

Nomad Digital

Market developments – Europe - Norway

- ❑ First national contract award
- ❑ Phase 1 = 21 trains
 - Long distance
 - Regional
 - Commuter
- ❑ Phase 2 = entire fleet (>260 sets)
- ❑ Scope
 - Initially entertainment
 - Now entertainment + passenger WiFi + op apps
- ❑ Cellular only + WiFi at hubs

Nomad Digital

Market developments – Europe - Norway

Type 73

Type 73B

Type 5

Type 70

Type 69C

Type EL18 Locos

Type 93

Type 7

Market developments – Europe – SL Trial

- ❑ SL = Stockholm transit
 - Buses, Commuter Rail, Metro
- ❑ Green agenda – funding
- ❑ Innovation
- ❑ Bus trial – forerunner to integrated solution
- ❑ Applications
 - Commuter WiFi
 - Passenger Info: Travel Info, news, weather
 - Operational Apps: fleet mgt, tyre pressure, engine emissions
 - Live CCTV

Nomad Digital

Market developments - UK

- High intent
- Passenger WiFi
- Franchise commitments, but not highest priority
- No significant new deals since last year's conference....yet
- OA starting on installed solns
- UK franchising system discourages investment
- ROSCOs still considering value
- Creative commercial deals required

Nomad Digital

THE FUTURE

The Future

- ❑ Passenger internet (WiFi) will still be a driving factor
 - Passengers will expect long-distance/intercity services to provide WiFi as standard (whether for-pay or for-free)
- ❑ Rail operators will use the platform for multiple applications
 - they will be expected to do so, to justify the initial investment
 - real-time cameras/security - use will grow (for ad hoc access)
 - operational applications
 - will vary enormously from operator to operator
 - but will be a no-brainer for rail operators who have already installed the system
 - Will start with one small application and grow slowly as the benefits are seen within the organisation
- ❑ Bandwidth limitation will become a problem on some deployments
- ❑ Rail operators will start to appreciate long term running costs
- ❑ UK rail operators will continue to commit investments into such systems in franchise bids
- ❑ Creative commercial deals will be required in many cases BUT more funding will become available

Nomad Digital

THANK YOU!
